Raw

```
1  /*
2      2 Сложное (по желанию): Допустим дан List<Account>.
3      Класс Account определен так же как и в уроке 15:
4          private String iban;
5          private double balance;
6          private Person owner;
7          private MyDate openDate;
8
9      Ваша задача реализовать следующий функционал:
10         получить List<Account> всех счетов с балансом больше заданного числа
11         получить List<Account> всех счетов заданного владельца
12  */
